

SAVE TENS OF THOUSANDS OF DOLLARS!

Eliminate "Disappearing" Towels!...Enhance Your Facility!

Preserve Your Valuable Human Resources and Storage Space!

THE Automated LOCKER™

A User-Friendly, Fast & Clean Towel Kiosk

Finally!...

This fully automated solution to Towel distribution, retrieval and inventory for your fitness club, spa, school, or resort. It pays for itself in less than one year and offers you a new revenue stream!

Your clients/students will love the cleanliness, ease, speed and convenience of 24/7 service afforded by this advanced technology. It offers total control without wasting your valuable human resources. You can program your machine to alert users that towels must be returned in order to get a fresh supply. You'll save on inventory without any awkward person-to-person confrontations. The Return Unit can be placed wherever it's needed, ensuring a neat, and convenient return.

See how this friendly, fast and clean Automated Locker can enhance your facility. Call for complete details and information on our money-saving lease and rental options.

YOUR CHOICE OF 3 MODELS

Designed to hold 600 -1600 items.

The largest capacity in the industry! In many cases requires refilling once every few days. (See reverse)

ADVANCED TECHNOLOGY:

User - Friendly, Money-Saving, & Easy as 1-2-3 !

- 1. Fresh, clean towels** are neatly stored inside the Automated Locker, eliminating the need for a costly storage room! You can choose from Lockers that store from 600 -1600 items!
- 2. Self-service!** Clients/Students simply insert ID card and in just seconds receive towels according to your pre-defined authorization. This transaction is then automatically recorded in your Control Unit.
- 3. Your Clients/Students return the soiled towels** to the Towel Return Unit, which records the return. The Towel Return Unit is lined with a canvas bag for easy transfer to the laundry.

Gain total control over inventory, usage and product security! Each transaction is automatically recorded in the control unit for real-time reports on usage and inventory. State-of-the-art security is controlled by I.D. cards, biometrics, or bar scanner.

A Windows-based Processor notifies your laundry to reorder specified amounts of each item as needed. This guarantees product availability 24/7. Never run out of product!
